WHAT IS GİF?

Güzel İşler Fabrikası, (Factory of Fine Works - GİF) serves as a physical study and activity center that provides a healthy working environment, primary resources, and educational support for students who are actively studying at high school, university, Master and doctoral levels.

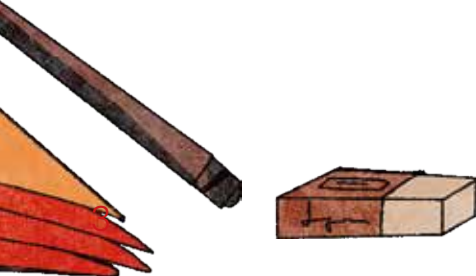

WHAT KIND OF NEED DOES GIF FULFILL?

A stable study schedule may not be possible for a variety of reasons such as economic, cultural, and social factors.

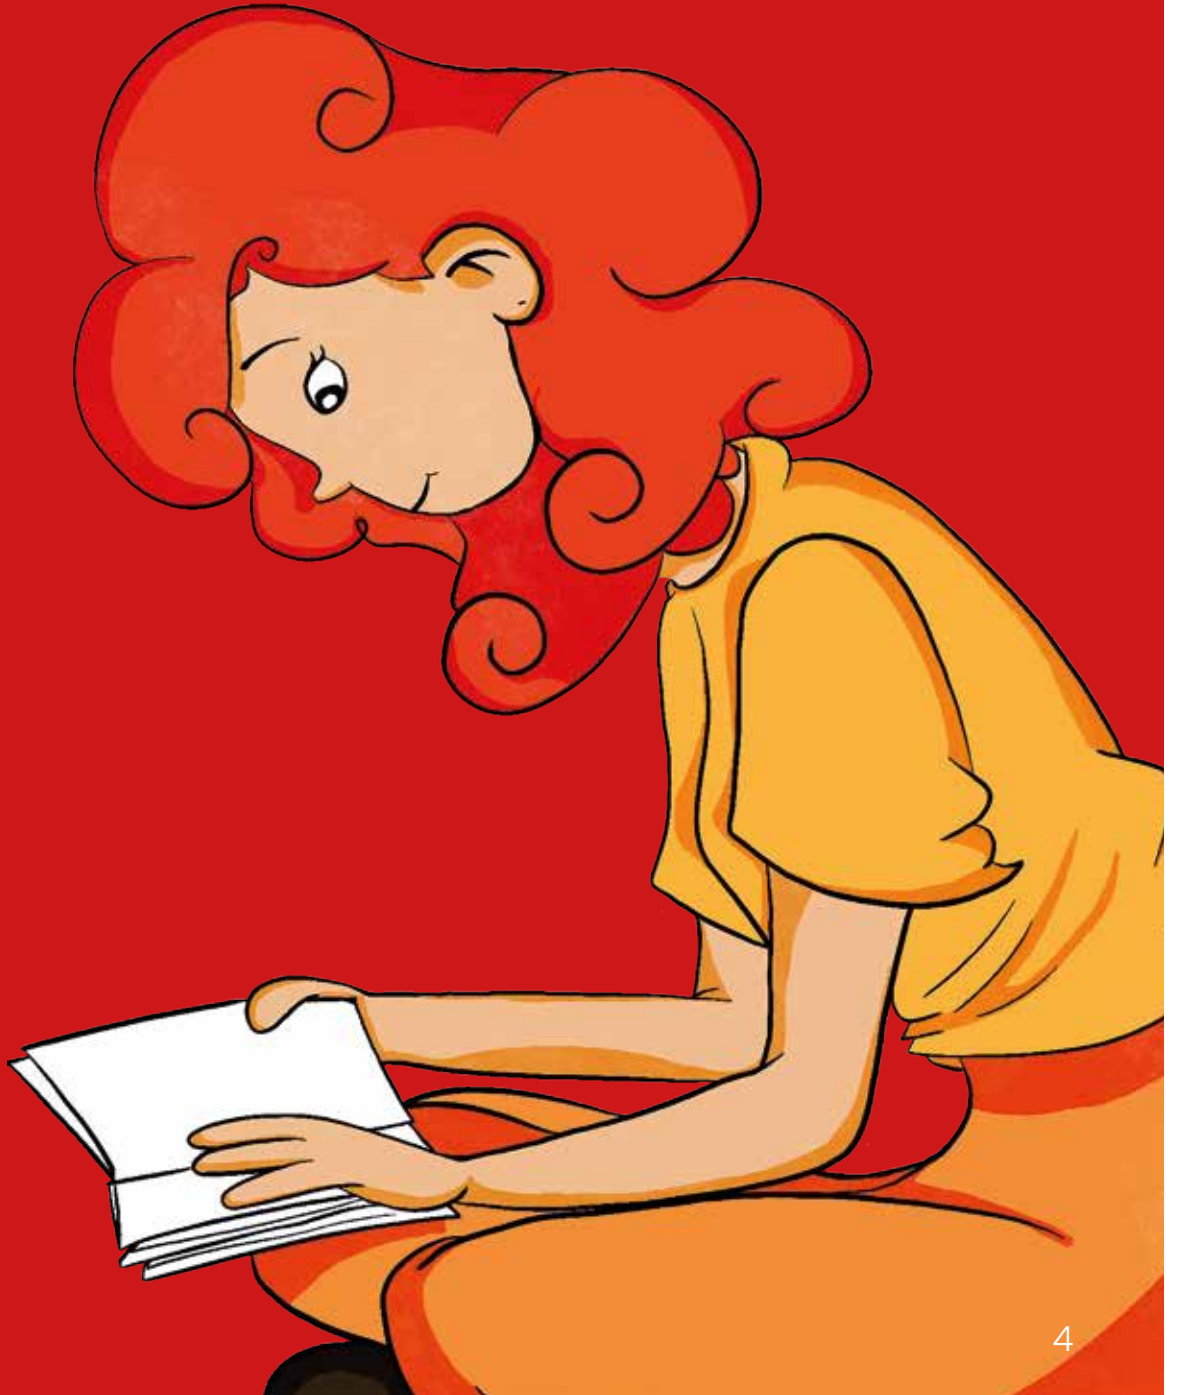

What is needed to make studying efficient and comfortable may not be observed by the child and the family due to unawareness or impossibility.

Since the family house is a shared and unstructured private space, it can be very difficult to control distractions.

Libraries and cafés which are the leading alternatives to working at home are insufficient at meeting the demand of young people and adults.

↳
TOPLANTI
UNUTMA!

With the increase in the young population and the education-learning process gaining a life-long qualification, the personal work area has gained even more importance; the search for solutions for out-of-home workspaces and the need for workspaces suitable for individual and group use, where work desks, chairs, internet connection, correct lighting, adequate heating, cooling, ventilation or cleaning, order, and nutrition factors can be offered at a certain standard have started to become evident.

As the **Youth and Education Service Foundation of Turkey**, we understand the importance of offering an equitable and structured study environment to students of all ages and educational levels to minimize the effects of disadvantages caused by cultural, social, and economic differences.

With the **Güzel İşler Fabrikası** (Factory of Fine Works - GiF), we aimed to create study and activity centers all over Turkey that students can benefit from safely and comfortably. Currently serving with two centers in İstanbul and one each in Ankara and Şırnak, **GiF** offers a stable study environment, cultural activities, and educational opportunities for students.

AIMS

To provide a free, accessible, and comfortable study environment for young and adult students.

To offer youth and adults the opportunity to build community through professional and academic activities.

To provide physical and equipment opportunities that students cannot find in private or public spaces for
